

BUTTCHAIN WHITEPAPER

Abstract

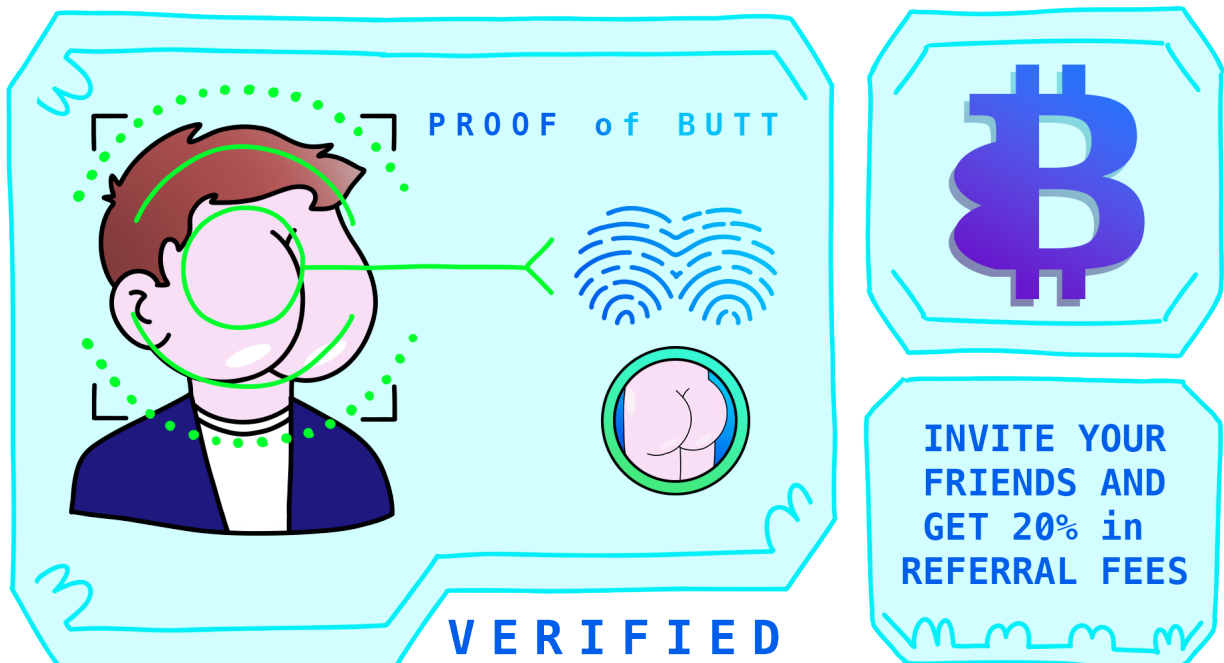

In the ever-evolving world of cryptocurrency, the market has been flooded with countless meme coins, each vying for a moment of fame. ButtChain emerges as a beacon of cheeky innovation, challenging the monotony with its unique blend of humour and technology. This document outlines the fundamentals of ButtChain, a cryptocurrency designed not just to ride the waves of blockchain tech but to introduce a playful twist into the blockchain space.

1 – Introduction

Fed up with the repetitive narrative of traditional meme coins? ButtChain offers a fresh perspective, integrating the spirit of levity with a fun degen twist on conventional cryptocurrencies. Unlike its predecessors, ButtChain is not just another addition to the noise but a creative parody that combines fun with some functionality.

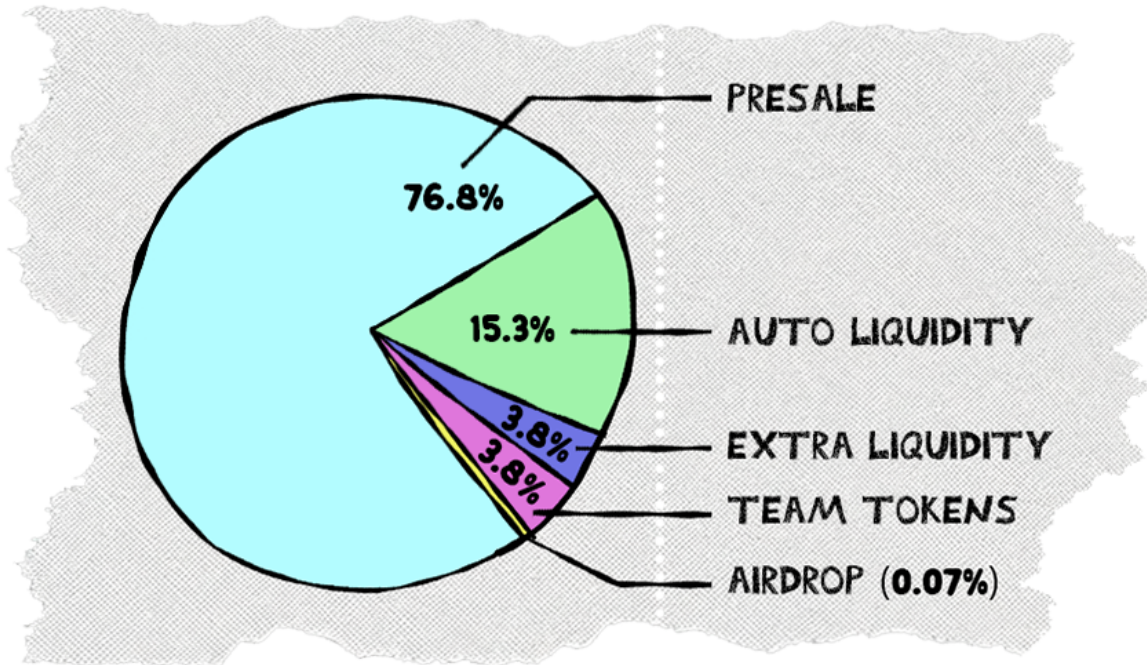

2 – Proof of Butt (PoB)

Diverging from the conventional Proof of Work (PoW) and Proof of Stake (PoS), ButtChain introduces the funny and innovative Proof of Butt (PoB) mechanism. This potentially viral feature, allows for decentralised marketing even after the presale is over. Users can independently promote ButtChain and earn 20% referral fees on the presale and 5% on secondary market swaps.

3 – Tokenomics

ButtChain’s tokenomics are designed to be playful yet practical, making the coin potentially engaging for some users. The distribution is as follows:

- **Presale:** 76.8% (Max 250,000,000 ButtChain)
- **Auto Liquidity:** 15.3% (Max 50,000,000 ButtChain)
- **Extra Liquidity:** 3.8% (Max 12,500,000 ButtChain)
- **Team Tokens:** 3.8% (Max 12,500,000 ButtChain)
- **Airdrop:** 0.07% (Max 250,000 ButtChain)

Presale ends latest in December 2024 or once all 250,000,000 ButtChain has been minted.

4 – Unique Features

Auto Liquidity: A portion of presale funds is automatically allocated via the smart contract in a decentralised way for Uniswap liquidity.

Liquidity Farming: Each ButtChain swap transaction in its liquidity pool incurs a nominal 5% fee, with a portion allocated to Uniswap's liquidity pool, while the remainder is divided between the creators of ButtChain, referrals, and a burn mechanism to reduce total supply.

Direct To Contract: Tokens purchased during the presale are immediately credited to the buyer's wallet, eliminating the rush for claims at launch.

Share and Earn Program: Participants can earn by sharing their unique referral link and when a tracked referred sale is made, allowing for fan engagement.

5 – Smart Contracts

ButtChain: A parody coin with a serious technological backbone, designed for those who appreciate both humour and innovation in the crypto space.
